

## Friday Exercise E09: Transformation & Coordinate System

Name: Conor Race

Due Date: **11/17 11:59pm.**

Consider the following three coordinate systems  $O$ ,  $A$  and  $B$  for Q1 – Q5.

**Note:**

- Cells of the grid are unit cells, which means the cell edge length is equal to 1.
- $M_{AB}$  is denoted as a math notation to represent the  $3 \times 3$  matrix that transforms the coordinate system  $A$  to  $B$ .
- $M^{-1}_{AB}$  represents the inverse matrix of  $M_{AB}$ , transforming the coordinate system  $B$  to  $A$ .

**Q1: (15pts)** What are the coordinates of  $P$  in the coordinate system  $O$ ?

$P = (1, 3)$  in coordinate system  $O$

**Q2: (15pts)** What are the coordinates of  $P$  in the coordinate system  $A$ ?

$P = (-1, 2)$  in coordinate system  $A$

**Q3: (15pts)** What are the coordinates of  $P$  in the coordinate system  $B$ ?

$P = (-0.71, 0.71)$  in coordinate system  $B$

**Q4: (15pts) Derive and calculate the values of  $M_{AB}$ .**

$$A = [0, 0, 1] \mid B = [3, 1, 1]$$

$$T(ab) = \begin{bmatrix} 1 & 0 & 3 \\ 0 & 1 & 1 \\ 0 & 0 & 1 \end{bmatrix} \quad R(ab) = \begin{bmatrix} \cos(135^\circ) & -\sin(135^\circ) & 0 \\ \sin(135^\circ) & \cos(135^\circ) & 0 \\ 0 & 0 & 1 \end{bmatrix}$$

$$M(ab) = T(ab) * R(ab) = \begin{bmatrix} -0.707 & -0.707 & 3 \\ 0.707 & -0.707 & 1 \\ 0 & 0 & 1 \end{bmatrix}$$

**Q5: (15pts) Use  $M_{AO}$  and  $M_{BA}$  to represent  $M_{OB}$ .** There is no need to calculate matrix values.

Please use the provided math notations ( $M_{AO}$  and  $M_{BA}$ ), their inverse forms, and the multiplication sign as necessary to express your answer.

$$\begin{aligned} M(ao) &= \begin{bmatrix} 0 & -1 & 1 \\ 1 & 0 & -2 \\ 0 & 0 & 1 \end{bmatrix} & M(ba) &= \begin{bmatrix} -0.707 & 0.707 & -3 \\ -0.707 & -0.707 & -1 \\ 0 & 0 & 1 \end{bmatrix} & M(ob) &= \begin{bmatrix} 0.707 & -0.707 & 2 \\ 0.707 & 0.707 & 3 \\ 0 & 0 & 1 \end{bmatrix} \\ M^{-1}(ao) &= \begin{bmatrix} 0 & 1 & 2 \\ -1 & 0 & 1 \\ 0 & 0 & 1 \end{bmatrix} & M^{-1}(ba) &= \begin{bmatrix} -0.707 & -0.707 & -2.828 \\ 0.707 & -0.707 & 1.414 \\ 0 & 0 & 1 \end{bmatrix} \end{aligned}$$

$$M^{-1}(ao) * M^{-1}(ba) = M(ob)$$
